TEXTBOOK: Numerical Analysis, 10th edition, by Richard L. Burden, J. Douglas Faires and Annette M. Burden

HOMEWORK: will be assigned every Thursday (except the weeks of midterms and Thanksgiving) and due the next Thursday in class. There are 12 homework in total. Homework may include MATLAB coding. LATEX is recommended for homework writing. 10 of your best grades will count in final grade. Late homework is not accepted unless there is a legitimate reason.

TESTS: There will be two midterm exams and one final exam. Missed exams can be made up in case of legitimate reasons. Midterm 2 is not accumulative. The final exam is accumulative.

MIDTERM EXAM 1: Thursday, September 26, 2019 (in class)

MIDTERM EXAM 2: Thursday, November 7, 2019 (in class)

FINAL EXAM: 8:00-10:00am, Wednesday, December 11 (for 11:00 lecture)

10:30am-12:30pm, Tuesday December 17 (for 3:30 lecture)

PROGRAMMING: MATLAB is required for this course. It is available at <https://terpware.umd.edu/Windows/title/1849>.

HONOR CODE: The UMD Code of Academic Integrity is administered by the Student Honor Council. The Code sets standards for academic integrity. You will be asked to write and sign the following honor pledge on each quiz and exam unless exempted by your instructor: "I pledge on my honor that I have not given or received any unauthorized assistance on this quiz/examination." Note that copying solutions from other sources is plagiarism.

GRADES: Letter grades are determined based on your total points, which includes

Midterms	$20 * 2 = 40$
Homework (10 best grades)	$2 * 10 = 20$
Final exam	40
TOTAL possible points	100

The letter grades are determined completely by your percentage in your own class (notice that the grades in my other class or the classes of other instructors have no influence on your letter grade).
